

Ad Elect

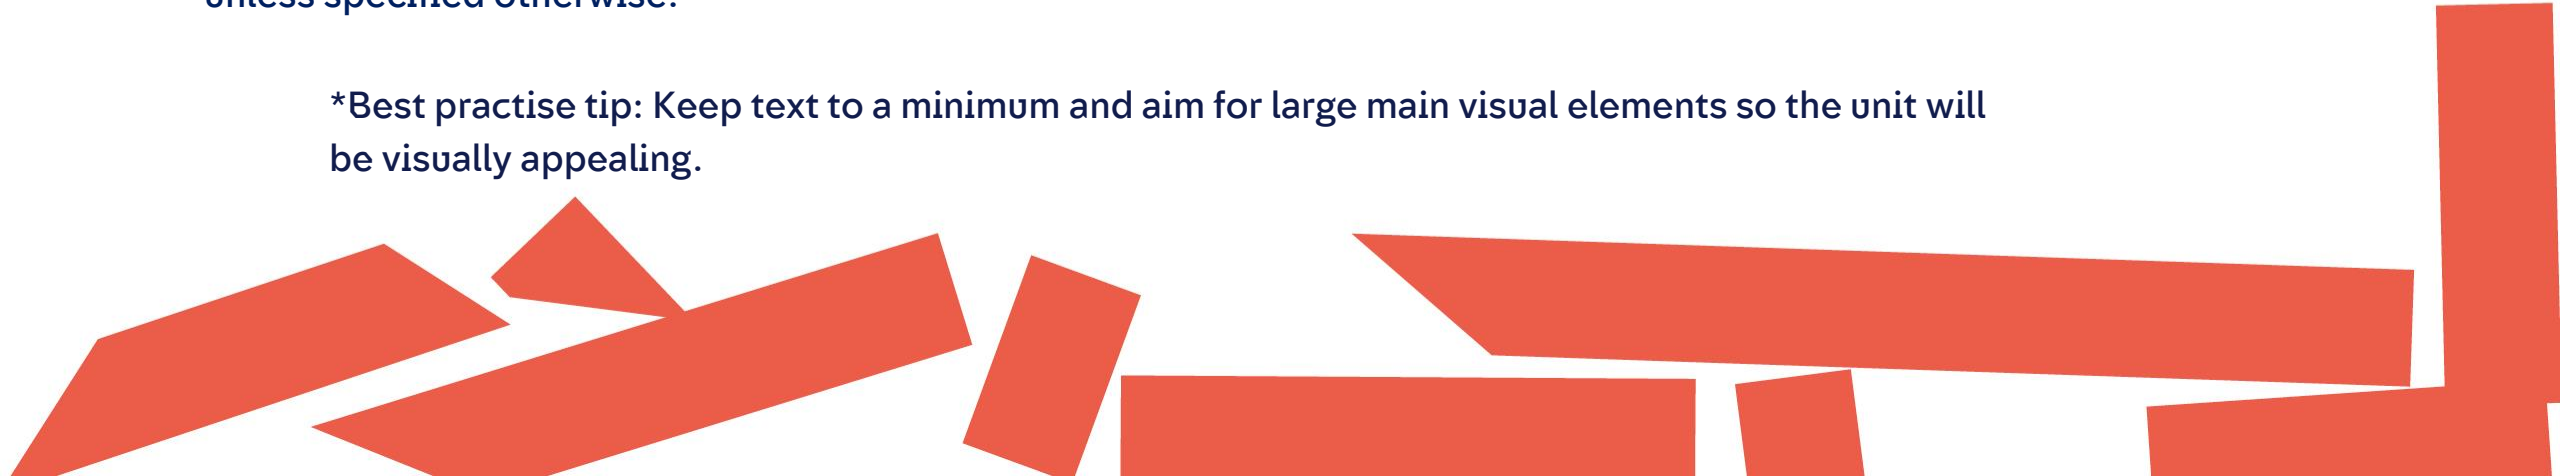

All 4 Ad specs

Ad Elect main points:

- The ad elect format is designed to give the user a choice of which ad they would like to watch, encouraging them to engage with the content by clicking on their preferred video.
- A user is initially shown a static slate, with thumbnails of each of the ads to choose from. If they do not select an ad within 10 seconds, one will be selected for them to watch.
- For best engagement rates, a maximum of 4 copies should be provided.
- This format takes 3 weeks to build, from receipt of all assets and completed creative brief.
- Additional formats can be implemented within the ad elect unit (eg. ad link, ad bloom), however this will increase the production cost and build time. Please inform us at booking stage.
- Tracking tags and copy need to be provided at least 5 working days before the campaign is due live, unless specified otherwise.

*Best practise tip: Keep text to a minimum and aim for large main visual elements so the unit will be visually appealing.

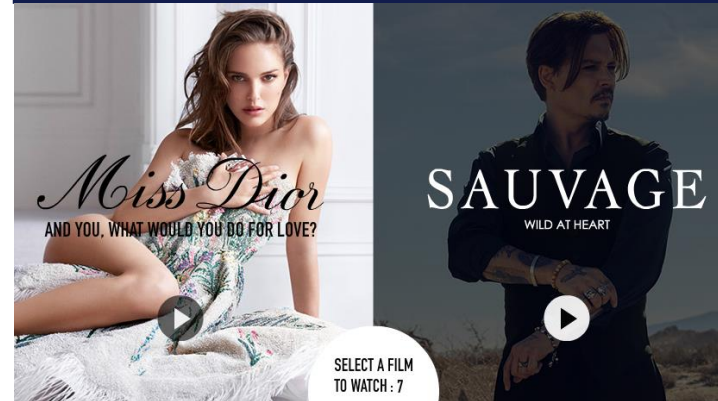

Ad Elect user journey:

Slate appears

Ad is selected

Pre roll plays

1 The slate appears immediately

2 The user can select their preferred video. If they do not choose, a default will play after 10 seconds

3 The pre roll plays

 - IMD
 - Beam
 - Honeycomb

*Please note, we cannot accept copies from a we transfer file, or attachment to email

Ad Elect production points:

- If feedback is required, these amends will be completed by end of play the following working day. If you have extensive feedback, this can sometimes take longer to implement and it may even require going back to the storyboard phase. If this is the case, you will be advised.
- When sending feedback, we ask that this is accumulated from all parties and sent altogether. If more feedback is sent after the initial round, these will be completed in the following round of amends.
- Once a storyboard has been approved, no design amends can be made to the working unit. Small text changes will be allowed.
- Instructions on default copy will need to be provided. These can either run in an even rotation, or 1 copy can be prioritised over the other/s.
- Trafficking can take up to 48 hours from full sign off.
