

Advanced All 4

Ad Reveal specs

Main production points

- This format is essentially a visually creative slate with a CTA that encourages users to click. The slate is comprised of an image that can open, or animate in a way that will 'reveal' the product or the pre roll underneath when clicked.
- The slate fills the screen and will countdown from 5". If a user does not click in this time, the unit will automatically animate and reveal the pre roll.
- This format takes approximately 3 weeks to build depending on complexity and from receipt of all assets and completed creative brief.
- Tracking tags and copy need to be provided at least 5 working days before the campaign is due live, unless specified otherwise.

*Best practise tip: Opt for large visuals and a strong, clear CTA to ensure the user is aware that they are able to interact

User journey

Countdown slate

1 The countdown slate appears giving users 5" to interact

The reveal

2 User interacts, or after 5", the slate animates to reveal the product underneath

Pre roll

3 Pre roll plays

- Copy can only be supplied in the following way:
 - Ad Stream
 - IMD
 - Beam
 - Honeycomb

*Please note, we cannot accept copies from a we transfer file, or attachment to email

Further production points

- If feedback is required, these amends will be completed by end of play the following working day. If you have extensive feedback, please note this can sometimes take longer to implement and it may even require going back to the storyboard phase. If this is the case, you will be advised.
- When sending feedback, we ask that this is accumulated from all parties and sent altogether. If more feedback is sent after the initial round, these will be completed in the following round of amends
- Once a storyboard has been approved, no design amends can be made to the working unit. Small text changes will be allowed.
- Trafficking can take up to 48 hours from full sign off.
